I'll check with Gary Miller the RPM. He may have something in the proposed plan for the RI. Not sure. My focus has been the cap and issues associated with it. Just finished getting the DRAFT final reassessment report done by one of our USACE guys Paul Schroder. He has identified several design and construction issues with the cap that need to be addressed ASAP by the RPs.

Ps. I did enjoy the forced vacation, although my last paycheck was pretty light! Ugh.

Hey Valmichael,

I hope you enjoyed the forced vacation. I was wondering if the dialogue on San Jacinto regarding adding amendments to the sediments ever went anywhere? This refers to the use of activated carbon as a remedial approach or as part of a capping remedy design for the sediment contamination. I'm looking for

9493960

folks across the Regions who have done/considered such approaches to add perspectives on this, and thought I'd reach out to you.

Please let me know.

Thanks,  
Marc
